Flood Advisory in Effect; Practice Caution in Heavy Rain

The National Weather Service (NWS) Guam Weather Forecast Office issued a **flood advisory**, in effect for Guam until 10 a.m. this morning. Urban and small stream flooding caused by excessive rainfall is expected. Between 0.4 and 1.2 inches of rain has already fallen. Additional rainfall amounts of 0.4 to 1 inch are expected, resulting in minor flooding.

Some locations that will experience flooding include Yona, Talofofo, Inarajan, Asan, Merizo, Piti, Santa Rita, and Umatac.

Residents and visitors are advised to take the following precautionary actions:

- If driving, be alert for low visibilities and slippery roads in heavy rain;
- Slow down where water is ponding on the road;
- Turn Around, Don't Drown. Avoid walking or driving through flood waters. Just 6 inches of moving water can knock you down, and 2 feet of water can sweep your vehicle away;
- Do not camp, park, or hike along streams, rivers, and creeks during heavy rainfall. These areas can flood quickly and with little warning.

A **high risk of rip currents** remains in effect for Guam, Rota, Tinian, and Saipan through late Sunday night. Dangerous rip currents are expected for east facing reefs of the Marianas. Rip currents can sweep even the best swimmers away from the shore into deeper water. Inexperienced swimmers should remain out of the water due to dangerous conditions. If caught in a rip current, do not swim against the current. Swim in a direction following the shoreline, face the shore and call or wave for help.

The Offices of Guam Homeland Security and Civil Defense (GHS/OCD) advise the community to practice caution while traveling in rainy conditions, driving below the speed limit and allowing enough braking distance between vehicles. Avoid dangerous rip currents, especially east facing reefs and beaches. Heed the advice of lifeguards, beach patrol flags, and signs.
